### **DETAILED ACTION**

Applicant's preliminary amendment and response to the Restriction Requirement in Paper No. 5, submitted December 9, 2002, is acknowledged wherein claims 1-4, 6, and 22-28 have been cancelled, and claims 29-34 are newly submitted. Currently, claims 5, 7-21, and 29-34 are pending in this application.

The following is a Supplemental Election/Restrictions Requirement in view of the Applicant's preliminary amendment December 9, 2002 in Paper No. 9.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5,7-13 drawn to a method for preventing dissemination of CMV in a human, classified in class 514, subclass 252.13 for example.
- II. Claims 14-21 drawn to a method for reducing cell motility in a CMV-infected cell, classified in class 514, subclass 252.13 for example.
- III. Claims 29-34 drawn to a method for treating CMV in a human, classified in class 514, subclass 252.13 for example.

Inventions Group I, II and III are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are separate and distinct each from the other because they have different functions and different modes of

operation. The invention of Group I functions to prevent dissemination of CMV in a human. The invention of Group II functions to reduce cell motility in a CMV-infected cell. The invention of Group III functions to treat CMV in a human. Therefore, Group I, II and III have different functions and different modes of operation.

The search for all inventions would place an undue burden on the Office in view of the diversity in the field of search for each.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

### ***Election of Species***

This application contains claims directed to the following patentably distinct species of the claimed invention:

a plurality of disclosed patentably distinct compounds in Groups I-III (see above the restriction requirement); and

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of a single specific composition comprising a specified individual active compounds to be employed in Groups I-III

for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 5, 7-21, and 29-34 are generic to a plurality of disclosed patentably distinct species. The claims read on the employment of various compounds of the structural formula herein, with great diversity of chemical

structure classified across class 514, the search for all of which presents an undue burden on the Office. It is noted that a reference to one individual agent would not be a reference to another individual agent under 35 U.S.C.103.

A "specie" is a specific compound or treatment, with all parameters and/or substituent variables FULLY accounted for.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
